

Workshop on “Computer vision for geo-Information”

Monday February 11, 2019, Wageningen UR, The Netherlands
Location: Gaia building, Droevendaalsesteeg 3 (Building 101),
Room Gaia 1 (ground floor)

The aim of the workshop is to present and discuss different perspectives for data science and computer vision for the processing and analysis of geographical data. The workshop precedes the PhD thesis defense of Diego Marcos Gonzalez at 16h that same day. You are also invited to attend the public defense of the thesis in the Aula.

Time	Subject	Name
12:00	Opening + light lunch	Devis Tuia
12:15	Deep learning research in the UiT Machine Learning Group with emphasis on autonomous vision-based power line inspection	Robert Jenssen, the Artic University, Tromso, Norway
12:45	Lake Ice Detection for Swiss Alpine Lakes	Konrad Schindler, ETH Zurich, Switzerland
13:15	3D Rigid and Articulated Object Registration for Robotics and Augmented Reality	Vincent Lepetit, Université de Bordeaux, France

Participation is free of charge, registration required to order the lunch. For registration, please send an email to [Antoinette Stoffers](mailto:Antoinette.Stoffers@wur.nl) (Antoinette.Stoffers@wur.nl).

We are looking forward for your participation!
